

Union Pacific 'Late' Challenger Reservation Information

We are offering eight basic versions of our Challenger, plus sub-versions where appropriate based on road number and production order. The quantities are limited so you may want to provide an alternate to your first choice and so designate it to prevent a further loss of time and possible selections, we will do our best to honor your first choice.

Version #1 - Early Coal - Each of the three production orders included in this version had unique detailing and our models will reflect that. The available road numbers and the production orders to which they belonged were: the first production order road numbers were 3950-3969, the second production order road numbers were 3975-3999 and the third production order road numbers were 3930-3949. Paint scheme: Black overall, Graphite smokebox & firebox and Aluminum color markings.

Version #2 - Coal 3967 (10 Models) - This version is the same as version #1 with the addition of wind wings (smoke lifters). Road number 3967 was one of two coal fired locomotives to have wind wings installed and was the only one to keep them until the end of service. Paint scheme: Black overall, Graphite smokebox & firebox and Aluminum color markings.

Version #3 - Late Coal - This version incorporates a number of substantial modifications made during the mid-service period, which included: new pilot, new firebox arrangement, relocated generator, ATC (automatic train control) equipment and extended coal boards. By the late service period eighteen locomotives had been converted to oil firing so the remaining appropriate road numbers for this version are: 3933, 3935, 3936, 3939-3942, 3945-3974, 3985-3999. Paint scheme: Black overall, Graphite smokebox & firebox and Aluminum color markings.

Version #4 - Early Oil Fired - The conversion to oil firing required substantial changes to the firebox and cab area of the locomotive, altered cab interior arrangement and a fuel tank in the coal bunker of the tender. Prior to being painted in the passenger paint scheme these eight locomotives had 'wind wings' installed, our models have removable 'wind wings' so that either period of operation can be modeled. The appropriate road numbers are: 3975-3984. Paint scheme: Black overall, Graphite smokebox & firebox and Aluminum color markings.

Version #5 - *Passenger Paint Scheme* (10 Models) - This is the same as our version #4 model, but with the famous two-tone gray passenger paint scheme with silver-grey stripes and lettering. Road numbers: 3975-3984.

Version #6 - Late Oil Fired - The late 'oil' version combines the design features of version #4 with the late modifications included on the version #3 models. Road numbers: 3700-3717. Paint scheme: Black overall, Graphite smokebox & firebox and Aluminum color markings.

Version #7 - Rio Grande (5 Models) - This is the Rio Grande L-97 variation of our Challenger. With Rio Grande markings, it has detailing much the same as our version #1 second production order models. The applicable road numbers are: 3800-3805. Paint scheme: Black overall, Graphite smokebox & firebox and White markings.

Version #8 - Clinchfield (5 Models) - This is the Clinchfield E-3 class variant complete with single large exhaust stack. The basic features of this version are similar to version #1 second production order models with modifications made once in Clinchfield service. The Clinchfield E-3's had road numbers: 670-675. Paint scheme: Black overall, Graphite smokebox & firebox and Yellow markings.

Union Pacific 'Late' Challenger Order Form

The price for all versions of the Challenger model is \$5,500_{USD} (plus shipping). Please confirm availability and shipping charges with us directly before ordering. Please include full payment with your order, using either check or check credit information on the reverse side of this order form. Information to pay by direct wire transfer will be provided upon request.
